ABOUT ME

I like to explore the complexities of the world, to challenge my own beliefs and to grow by learning. I'm specially interested on healthcare related problems. This is a field that not only I'm passionate about, but where I can add value to the team from my first hand experience as a nurse.

SKILLS

Programming languages

Python R

Frameworks

pandas numpy scikit-learn matplotlib
tidyverse shiny spark keras

Other tools

Linux Dokuwiki Git OpenAI API Docker
Telegram API

Additional experience with

C / Java / HTML5 / CSS3 / MySQL /
Microsoft SQL Server / MongoDB / Neo4j /
Cassandra / Microsoft Visual Studio /
Pentaho Spoon

EDUCATION

Master's Degree on Data Science

Universitat Oberta de Catalunya (2021)

Since I had a non-engineering background, I did a total 120 ECTS (2 years), 60ECTS on preparatory subjects and 60ECTS on Data Science.

Nursing Degree

Universidad de La Laguna (2017)

The subarea I am most interested in nursing is public health. How the particular integrates in the general and the extraction of patterns has always caught my attention.

EXPERIENCE

Nurse

Servicio Canario de Salud (2017-2023)

I have worked in several positions in the Health Area of La Palma, Canary Islands.

Primary Care / Pediatrics (primary care) / Emergency Room / Hospital Wards / Vaccination Center

LANGUAGES

Spanish - native
English - C1

HOBBIES

I love to feel the pull of the void, climbing and slacklinning are some of my favourite things to do.

OTHER INTERESTS

I love to learn new things. I read non-fiction, play various instruments and tinker with my servers.
